# Refer Market

Category: Reference

Description:

This is the perfect app for you if you want to use some company's product but cannot find a friend to refer you. You will find all the referral information here and get the benefit of getting referred.

Keyword:

Refer, reference, market, friend

Screenshots:

In this app, you could see various refers from different companies. We provide you with the necessary referral links or referral code you need, so that you could conveniently receive the benefits referred by a friend without finding a friend to refer you.

In each referral item, you could click the "Get Referred Now" and it will direct you to the registration webpage. You could also click the "Save the refer" button and it will save that particular refer for you. We use a sqlite3 database to save all the referral information, and another sqlite3 database to save all your saved referral information. In the future I will incorporate the parse
